THE INFORMATION DISCLOSED IS GIVEN TO THE BEST OF SELLER'S KNOWLEDGE.
NOTICE: This Disclosure Statement satisfies the disclosure requirements of MN Statutes 513.52 through 513.60. Under Minnesota law, sellers of residential property, with limited exceptions listed on page nine (9), are obligated to disclose to prospective buyers all material facts of which Seller is aware that could adversely and significantly affect an ordinary buyer's use or enjoyment of the property or any intended use of the property of which Seller is aware. MN Statute 513.58 requires Seller to notify buyer in writing as soon as reasonably possible, but in any event before closing, if Seller learns that Seller's disclosure was inaccurate. Seller is obligated to continue to notify Buyer, in writing, of any facts disclosed herein (new or changed) of which Seller is aware that could adversely and significantly affect the Buyer's use or enjoyment of the property or any intended use of the property that occur up to the time of closing. Seller has disclosure alternatives allowed by MN Statutes. See Disclosure Statement: Seller's Disclosure Alternatives form for further information regarding disclosure alternatives. This disclosure is not a warranty or a guarantee of any kind by Seller or licensee(s) representing or assisting any party in the transaction and are not a substitute for any inspections or warranties the party(ies) may wish to obtain.
For purposes of the seller disclosure requirements of MN Statutes 513.52 through 513.60:
"Residential real property" or "residential real estate" means property occupied as, or intended to be occupied as, a single-family residence, including a unit in a common interest community as defined in MN Statute 515B.1-103, clause (10), regardless of whether the unit is in a common interest community not subject to chapter 515B.
The seller disclosure requirements of MN Statutes 513.52 through 513.60 apply to the transfer of any interest in residential real estate, whether by sale, exchange, deed, contract for deed, lease with an option to purchase or any other option.
INSTRUCTIONSTO BUYER: Buyers are encouraged to thoroughly inspect the property personally or have it inspected by a third party, and to inquire about any specific areas of concern. NOTE: If Seller answers NO to any of the questions listed below, it does not necessarily mean that it does not exist on the property. NO may mean that Seller is unaware that it exists on the property.
INSTRUCTIONS TO SELLER: (1) Complete this form yourself. (2) Consult prior disclosure statement(s) and/or inspection report(s) when completing this form. (3) Describe conditions affecting the property to the best of your knowledge. (4) Attach additional pages, with your signature, if additional space is required. (5) Answer all questions. 299. 300. 301.	0.	WATER INTRUSION AND MOLD GROWTH: Recent studies have shown that various forms of water intrusion affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture leaving the home.
302. 303. 304. 305. 306.		 Examples of exterior moisture sources may be improper flashing around windows and doors, improper grading, flooding, roof leaks.
307. 308. 309. 310. 311. 312. 313. 314. 315.		Examples of interior moisture sources may be • plumbing leaks, • condensation (caused by indoor humidity that is too high or surfaces that are too cold), • overflow from tubs, sinks or toilets, • firewood stored indoors, • humidifier use, • inadequate venting of kitchen and bath humidity, • improper venting of clothes dryer exhaust outdoors (including electrical dryers), • line-drying laundry indoors, • houseplants—watering them can generate large amounts of moisture.
317. 318. 319.		In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property. Therefore, it is very important to detect and remediate water intrusion problems.
320. 321. 322. 323.		Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health problems, particularly in some immunocompromised individuals and people who have asthma or allergies to mold.
324. 325. 326. 327. 328.		To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the property inspected for moisture problems before entering into a purchase agreement or as a condition of your purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the property.
329. 330.		For additional information about water intrusion, indoor air quality, moisture or mold issues, please view the Minnesota Association of REALTORS® Desktop Reference Guide at www.mnrealtor.com.
